

Acclimation Technical Capabilities Document

Acclimation is a provider of SAP NetWeaver services and support addressing the needs of each of the layered components of people, processes and information. We have aligned ourselves closely with SAP's NetWeaver product solutions in order to assist our clients in maximising the investment in their mission critical SAP systems. Our proven approach increases the flexibility, usability and ultimately the total cost of ownership from the SAP enterprise applications by enhancing the way users access and interact. Whether you are looking to create graphically rich user interfaces through Adobe forms or flex/flash or building applications that run on the SAP Enterprise Portal, Acclimation has the experience to help you extend the reach of your SAP enterprise applications.

SAP NetWeaver is a web-based, open integration and application platform that serves as the foundation for service-oriented architecture (SOA) and allows the integration and alignment of people, information, and business processes across business and technology boundaries. It utilises open standards to enable integration with information and applications from almost any source or technology. Often used as a central tool for reducing the total cost of ownership(TCO) of complex system infrastructures SAP Netweaver is also the technical foundation on which all of the SAP solutions are based.

Acclimation Technical Capabilities

People

Acclimation specialise in user interface technologies providing flexible intuitive ways for users to interact with the SAP business suite of applications.

Processes

Acclimation is experienced at enhancing and optimising SAP business processes using the SAP NetWeaver capabilities.

Information

Acclimation leverages the complete SAP NetWeaver range of tools to modify, extend and administer the SAP business suite of applications.

Systems

Acclimation has expertise with integrating with SAP and third party systems using the SAP NetWeaver and Microsoft integration platforms.

People

The IT practice of user productivity enablement helps users and groups improve their productivity within SAP applications through easy to use, user interfaces, user collaboration, optimised knowledge management, and personalised access to applications and data using Web-based portals and Adobe interfaces. Acclimation specialises in User Productivity Enablement with skills in SAP UI technologies such as SAP Enterprise Portal, SAP Interactive forms by Adobe and Adobe Flex/Flash. Web Dynpro (ABAP/JAVA), BI/BW Web Application Designer, Guided Procedures and Visual Composer.

Processes

Acclimation's expert skills in SAP NetWeaver and business process re-automation give our consultants the edge when designing and implementing end-to-end SAP application enhancements. We have experience in a variety of tools including: SAP Interactive Forms by Adobe, SAP Business Workflow, SAP Composite Application Framework (Cross component BPM) and SAP Guided Procedures.

Information

Each of our SAP experts are certified and have a broad range of customer experience implementing SAP Enterprise Portal, SAP Interactive forms by Adobe, SAP Script/Forms, SAP Business Workflow, HCM Processes and Forms, SAP Visual Composer, SAP NetWeaver Developer Studio, SAP Composition Environment and Composite Application Framework.

Systems

Acclimation has expertise in integration and middleware technologies to ensure that your investments in SAP are seamlessly and reliably integrated with other systems, technologies and custom applications within the enterprise as well as with companies who you do business with. Using native integration points such as BAPIs, RFCs and IDocs or dedicated integration environments using SAP Process Integration or Microsoft Biztalk, Acclimation will ensure data is securely passed between integrated systems.
